EDUCATION

BS Artificial Intelligence

Abasyn University Islamabad Campus

Currently in 7th Semester

Expected Graduation: 2027

TECHNICAL SKILLS

- Python
- Machine Learning
- Deep Learning
- Computer Vision
- TensorFlow / Keras
- Scikit-learn
- OpenCV
- YOLO (Ultralytics)
- Pandas, NumPy, Matplotlib
- SQL / MySQL
- Java
- C++
- JavaScript
- Node.js, Express.js
- React Native (Expo)
- Git & GitHub
- Google Colab, Jupyter Notebook
- VS Code, PyCharm

SOFT SKILLS

- Problem Solving
- Analytical Thinking
- Team Collaboration
- Effective Communication
- Time Management
- Adaptability
- Continuous Learning
- Leadership

CERTIFICATIONS

None

Muhammad Ibrahim Hashmi

Motivated and dedicated AI student with a strong foundation in machine learning, computer vision and software development. Passionate about building intelligent solutions that solve real-world problems. Always eager to learn, explore new technologies and contribute to impactful projects.

PROJECTS

Pur-Aman Pakistan: Intelligent Public Safety Assistance and Suspicious Activity Detection System

(FYP – In Progress)

An AI-powered system that allows citizens to report suspicious activities using image, video, audio or text. The system analyzes the data, assesses risk level and recommends appropriate actions.

- Using YOLOv8 for object detection (weapons, fire, smoke, violence, accidents, etc.)
- Integrated NLP for text analysis and risk classification
- Backend with Node.js, Express and SQLite
- Mobile application development using React Native (Expo)
- Implementing authentication, real-time alerts and location mapping

Tech Stack: Python, TensorFlow, YOLOv8, OpenCV, NLP, React Native, Node.js, Express, SQLite

AI Resume Builder

Built a free AI-powered resume generator with 5 templates, scoring, and instant PDF download. Deployed using Python, Streamlit, and Scikit-learn.

Tech Stack: Python, Streamlit, Scikit-learn

Performance Evaluation of YOLO for Real-Time Object Detection

(2024)

Evaluated YOLOv8 performance under different conditions using COCO dataset.

- Compared YOLOv8 with other models on accuracy and speed
- Analyzed performance across varying lighting, occlusion and object scales
- Visualized mAP, Precision, Recall and FPS

Tech Stack: Python, YOLOv8, COCO Dataset, OpenCV, Matplotlib

Movie Recommendation System

(2024)

Built a content-based recommendation system that suggests movies based on user preferences.

- Used TF-IDF Vectorization and Cosine Similarity
- Implemented with Python and Streamlit
- Deployed locally with a simple and interactive UI

Tech Stack: Python, Pandas, Scikit-learn, Streamlit

Student Grades Management System

(2023)

Desktop application to manage student records, courses and grades.

- Performed CRUD operations with MySQL database
- Developed using Java (Swing) with OOP principles
- User authentication and role-based access

Tech Stack: Java, MySQL, Swing

Sales & Weather Data Analyzer

(2023)

Analyzed sales and weather data to find patterns and correlations.

- Data cleaning, preprocessing and exploratory data analysis
- Visualized insights using Matplotlib and Seaborn
- Built predictive models to forecast sales trends

Tech Stack: Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

ACHIEVEMENTS

- College Cricket Team Captain
- Won 2 College Cricket Tournaments
- Won 2 Racing Competitions (500 Meters) at College Level
- University Cricket Team – Championship Winner and Runner-up
